Mark/Mike/Curtis/Bob –

Below is a draft response to Dr. Khan's letter (attached). Again, it may not be appropriate for us to CC the county on all correspondence to the PRPs as they request, but I think we can convey that we will keep them informed as we see necessary. Please let me know if you have thoughts/comments and I'm happy to finalize.

Dear Dr. Khan,

Thank you for your letter dated April 30th, 2015. EPA greatly appreciates the County's continued interest and involvement in the West Lake Landfill Superfund Site. We understand the County's role in regulating activities related to the Bridgeton Landfill, and I and the rest of the West Lake team will make certain that your staff are apprised of developments that may impact Operable Unit 2 as we progress in our cleanup efforts at the Site. We strive to make correspondence and finalized reports publicly available on our website, and will continue to do so to keep all stakeholders informed of Site-related activities. EPA will make every effort to provide copies of key documents to your office as appropriate. If you have any questions or would like to discuss further, please do not hesitate to contact me at (913) 551-7826.

Sincerely,

Alyse Stoy
